תאור Description	ריבוע Square	מס' לוקוס / קיר Wall/Locus No.
Bucket 201: Today the locus and bucket exclude the NW		20
corner of the square and the S strip of medium-sized		
stone (may be a foundation trench).		
After digging down quite a bit we have two distinctly different		
soil colors, but with very similar content. In the N half of		
the ~~square~~ bucket area, the soil is brownish-yellow. In		
the S part of the bucket area, it is brown. All the way		
down, we have found an abundance of small stones, and		
quite a bit of ceramic sherds. Towards the end of the day,		
we came across some larger stones in the S half of the		
square. They appear to be random, but we will		
articulate around them.		
We have also found some remains of a plaster floor along		
the E side of the square. Near the plaster, we found		
a coin at elevation 750.53.
