תאור Description	ריבוע Square	מס' לוקוס / קיר Wall/Locus No.
We returned to locus 42 which was the areas under the pavers. We began excavating down.	D	42
The digging was gradual as every layer we picked was scanned thoroughly for metal and coins. Only two coins and some metal (iron) frags were found in that manner. There was nothing new that we didn't see in the probe (except for the coins that is). Pottery, (L.R.W + Early/late Roman) + bone + metal + coins.		
	D	43
A new locus was created because there was a significant change in the fill composition. We went from dirt and some loose rocks to very small rocks (probably shale) with very little dirt. (almost purely rocks. Very few artifacts were found in this locus. Some (sparse) pottery and bone frags.
