תאור Description	ריבוע Square	מס' לוקוס / קיר Wall/Locus No.
we continued in locus 43 excavating down through the 'shale' layer. A broken coin was found by the bulk and at (46 1/2 relative) we changed locus after coming to a new layer of soil.	D	43
The rocks were not shale anymore but were small and larger pieces of fieldstone. Here the artifacts are abundant. large amount of pottery.	D	44
<u>Interesting notes:</u>		
* as in the probe we witnessed plaster on both the North and west walls of the square. The plaster started at power level and continued down to the bottom of the walls and the beginning of the foundations for these.		
* on the same level all around the square there are foundation walls for the upper walls.		
walls mostly fieldstones some seen to be later and cut. The pillar is interesting in that it has another power under the stilabate.
