

מסכת למתן תורה

Locus 113

Phase: pre-syn 2 or 3

Maoz: Synagogue foundation fill (field stones, broken stones and earth), under floor level but not sealed by flagstones (this does not appear in Maoz's list of coins in foundation fill) see page 5

Locus

On page 6, here L. 113 is below a floor associated with phase 3. It is a foundation layer of basalt pebbles.

Lower down on page 6, L. 113 is described as a floor segment which apparently served as an alley between two structures. What is it??

✓ Ariel: Either accumulations during Phase 3 or constructional fills for the foundation of the synagogue.

Ceramics: Late Roman assemblage (3rd-4th c.)

Coins: 4 (351-361 CE).

This appears to be below L. 107

This locus is full down to pebbles?

correct

correct

ל"ו ל"ג ל"ב ל"א

L. 120 is below pebbles layer
